

STEALING AMERICA: VOTE BY VOTE

****** four stars**

According to a startling new documentary feature, American elections may have been hijacked by malicious operatives favoring the right wing of the political spectrum, overturning the will of the people in vital elections, including for the Presidency. "Stealing America: Vote By Vote" starts with one key question – why have traditionally reliable "exit polls" recently become untethered from official voting tallies? The answer, according to "Stealing America," is a variety of nefarious tactics, right up to and including outright criminal acts. Narrated by Peter Coyote and featuring interviews with election officials, computer security analysts, pollsters and political activists, "Stealing America" is a devastating indictment of the current electoral system and a loud wake-up call to voters across the country. With the November elections around the corner, "Stealing America: Vote By Vote" must be seen – and answered.
